

COMBUSTION

GENERAL INDEX OF EDITORIALS AND ARTICLES

(Vol. I, No. 1, July, 1929, to and including Vol. I, No. 12, June, 1930)

Feature Editorials—

	PAGE		PAGE
A Statement of Ownership and Policy.....(July 1929)	27	Building of Vessels for High Pressure and High Temperature Service. By T. McLean Jasper.....(Dec. 1929)	23
Engineering. By Martin E. Popkin.....(March 1930)	19	Case of Coal, The. By George H. Ashley.....(June 1930)	24
Engineers Should be More Active in Public Life. (Aug. 1929)	21	Combined Low Temperature Carbonization and Combustion for Power Stations. By David Brownlie....(Dec. 1929)	43
In 1930 Become an Engineer. By Harvey N. Davis (Feb. 1930)	23	Combined Total Gasification and Combustion of Coal. By David Brownlie(Nov. 1929)	35
Margins of Improvement in Station Heat-Rates. By W. N. Barnard(June 1930)	19	Combustion Characteristics of Gaseous Fuels. By Fred M. Reiter(June 1930)	28
Mergers of Men and Equipment. By W. R. Wood (Nov. 1929)	23	Correct Boiler Design an Essential Factor in the Production of Dry Steam. By K. Toensfeldt.....(Sept. 1929)	40
Power and Heat Should be Coordinated. By David Moffat Myers(Sept. 1929)	23	Correct Method of Using the Oxygen Bomb Calorimeter for Determining the Heat Value of Solid Fuels. By John Cruise(Dec. 1929)	50
Progress—1920 to 1930. By Dr. Julius Klein..(April 1930)	19	Description of the Hams Hall Power Station, Birmingham, England(Feb. 1930)	48
Public Utility Outlook for 1930, The. By Paul S. Clapp(Jan. 1930)	23	Determination of the Dust Content of Gases. By W. A. Grobli(April 1930)	31
Standardization in Steam Plant Engineering. By Collins P. Bliss(Dec. 1929)	21	Development of a High Pressure System for Boiler Water Conditioning. By A. A. Markson.....(April 1930)	27
Technically Trained Leaders in Industry. By P. Junkersfeld(Oct. 1929)	23	Development of a High Pressure System for Boiler Water Conditioning. By A. A. Markson. Discussion by R. E. Hall(May 1930)	45
What Do I Wish? What Can I Do? By B. H. Wither- spoon(May 1930)	17		

Editorials—

An Achievement in Engineering Journalism....(May 1930)	18	Economies in the Generation and Distribution of Power. By W. A. Shoudy.....(May 1930)	30
John Anderson—Pioneer(Dec. 1929)	22	Engineer and His Place in our Industrial Society, The. By Martin E. Popkin.....(Oct. 1929)	25
A New Steam Capacity Record.....(March 1930)	20	Engineering Research. By Alex D. Bailey....(May 1930)	24
An Example(Aug. 1929)	22	Engineering Units. By W. L. DeBaufre.....(Feb. 1930)	34
Business is Good.....(Aug. 1929)	22	Equipment of Highest Thermal Efficiency Not Always Justified for Industrial Steam Plants. By H. G. Ebdon. (Aug. 1929)	48
Civilization's Contribution to Science.....(June 1930)	20	Errors in the Measurement of the Temperature of Flue Gases(Aug. 1929)	33
Coal is King!(June 1930)	20	Feed Water Treatment of Special Importance at High Rates of Evaporation. By A. R. Mumford.....(Sept. 1929)	43
Cooperation Between Plant Engineers and Equipment Manufacturers(Jan. 1930)	24	Flexibility of Pulverized Fuel Installation of Advantage for Large Units. By Otto deLorenzi.....(Aug. 1929)	43
Development in Boiler Design.....(Dec. 1929)	22	Ford Museum to Exhibit First Heine Boiler... (April 1930)	47
Facing Forward(Aug. 1929)	22	Ford to Install Largest Capacity High Pressure Boilers in the World(Nov. 1929)	39
Feed Water Treatment.....(Jan. 1930)	24	From Towering Firs to Kilowatts. By William A. Struthers. (Feb. 1930)	25
Future of Fuel Burning, The.....(Oct. 1929)	24	Fuels and Furnaces in Heat Treatment of Steel. By W. O. Renkin(March 1930)	38
Hydro vs. Steam(July 1929)	28		
Fred R. Low Retires.....(Feb. 1930)	24		
Modern Steam Plants Have a High Reliability Factor (Feb. 1930)	24		
More Power—Less Noise.....(March 1930)	20		
Opposite View Points—Both Correct.....(April 1930)	20		
Politics(July 1929)	28		
Power Plants Are Not Mystery Plants.....(Nov. 1929)	24		
Public Ownership on a Decline.....(Sept. 1929)	24		
Science Opens the Door.....(May 1930)	18		
Steam Gains—Hydro Loses.....(March 1930)	20		
Test Results That Record Daily Performance..(Nov. 1929)	24		
Thriving Companies(Oct. 1929)	24		
Throttling Legislation Threatened.....(April 1930)	20		
Tomorrow's Executives(Sept. 1929)	24		
Why Not Give the Plant a Vacation?.....(June 1930)	20		

Articles—

Airplane Carrier Lexington Helps Tacoma Meet Power Emergency. By A. F. Darland.....(Feb. 1930)	44	German View of Powdered Fuel and Stokers, The (Sept. 1929)	46
A 282 Mile Pipe Line for Natural Gas. By C. W. Geiger (Nov. 1929)	52	Giant Power Plant for Industrial Chicago....(Aug. 1929)	52
An Important Development in Traveling Grate Stoker Practice(March 1930)	47	Greatly Improved Efficiency Follows Modernizing of Central Power Plant Serving Rhode Island State Institutions. By Charles E. Blais(June 1930)	21
Atmospheric Air. By W. L. DeBaufre.....(Jan. 1930)	45	Hayes Process Low Temperature Carbonization Plant at Moundsville, W. Va., The. By J. D. McQuade.(Nov. 1929)	28
A Winter Morning Load Pick-Up. By A. R. Mumford (Jan. 1930)	47	Heat Absorbing Surfaces in Modern Boiler Furnaces. By R. J. S. Pigott.....(July 1929)	29
		Heat Balance Test as a Means of Obtaining Evaporative Efficiencies of Steam Generation Equipment, The. By B. J. Cross.....(July 1929)	43
Bethlehem Steel Burns Blast Furnace Gas and Pulverized Fuel in an All Metal Furnace. By Eric Lundgren (Jan. 1930)	29	Heat and the First Law of Thermodynamics. By W. L. DeBaufre(April 1930)	21
Bi-Centenary Meeting of the Newcomen Society.(Sept. 1929)	54	How to Calculate the Air Required for Combustion and the Air Actually Supplied. By B. J. Cross.....(Feb. 1930)	46
Boiler Feed Water Regulation. By J. W. Mackenzie (Dec. 1929)	31		

	PAGE
How to Calculate the Loss Due to Heat in Dry Flue Gas. By B. J. Cross.....(Aug. 1929)	46
How to Calculate the Losses Due to Hydrogen and to Moisture in Fuel. By B. J. Cross.....(Sept. 1929)	52
How to Calculate the Loss Due to Unburned Carbon. By B. J. Cross.....(Nov. 1929)	50
How to Calculate the Loss Due to Water Vapor in Air Used for Combustion of Fuel. By B. J. Cross.....(Oct. 1929)	52
How to Compare the Relative Value of Different Fuels. By B. J. Cross.....(June 1930)	42
How to Determine the Conditions for the Most Economical Boiler Operation. By B. J. Cross.....(March 1930)	44
How to Determine the Moisture in Steam. By B. J. Cross. (April 1930)	48
How to Determine the Suspended Solids in Flue Gases. By B. J. Cross.....(May 1930)	48
How to Estimate the Loss of Heat Due to Radiation from a Boiler Setting. By B. J. Cross.....(Jan. 1930)	48
Industrial Steam Generation Practice in Great Britain. By David Brownlie.....(July 1929)	40
Influence of Modern Central Station Design Upon Industrial Power Plant Practice, The. By W. L. Fergus.(Nov. 1929)	46
Installing a Stoker Over the Week-End. By Merl J. Chapman.....(March 1930)	46
Is Soft Water the Criterion of Scale Prevention? By A. R. Moberg & E. M. Partridge.....(March 1930)	21
Kips Bay Station to Install 750,000 lb. Unit..(May 1930)	50
Lessing Coal Cleaning Process, The. By David Brownlie. (April 1930)	42
Lignite Power Stations in Germany. By David Brownlie. (Sept. 1929)	25
Loss Due to the Presence of Carbon Monoxide in the Flue Gases, The. By B. J. Cross.....(Dec. 1929)	48
Loss in Agglutinating Power of Coal Due to Exposure. (June 1930)	44
Matthew Murray and "Steam Hall".....(Jan. 1930)	46
Natural Gas Burner Applications. By E. B. Plapp (March 1930)	24
New Developments in British Industrial Steam Station Practice. By David Brownlie.....(Feb. 1930)	39
New Industrial South, The. By John M. Gallalee.(Oct. 1929)	29
Ninety People Attend Luncheon Inside Boiler..(Jan. 1930)	50
Personnel—A Factor of Increasing Importance in the Modern Power Plant. By Roger D. DeWolf.....(Aug. 1929)	30
Phosphate Treatment of Boiler Water. By Edward P. Price.....(Jan. 1930)	35
Placing a Steam Power Plant in Commission. By William S. Johnston.....(Sept. 1929)	35
Power Station Practice in Great Britain. By David Brownlie. (Aug. 1929)	34
Practical Economies from Dry Quenching of Coke. By W. Sennhauser.....(Sept. 1929)	47
Principles of Automatic Control for Steam Boilers. By T. A. Peebles.....(Oct. 1929)	39
Problems of the Small Plant. By T. S. Jardine & W. Humphries.....(March 1930)	34
Processes of Combustion in a Furnace, The. By Henry Kreisinger.....(Nov. 1929)	32
Progress in the Use of High Pressure Steam. By J. B. Crane. (April 1930)	35
Recent Developments in Stoker Design. By H. D. Savage. (Nov. 1929)	40
Recovering Unburnt Fuel from Ash Pit Refuse. By David Brownlie.....(May 1930)	40
Refractory Furnace Developed for Modern Practice, The. By R. D. Foltz.....(Aug. 1929)	39
Saving Midwestern Dollars by Matching Fuel Burning Equipment to Available Coal. By T. A. Marsh....(July 1929)	50
Selection of Stoker Drives, The. By T. A. Peebles (Jan. 1930)	25
Some of the Industrial Uses to Which Powdered Coal is Being Applied. By H. W. Brooks.....(Oct. 1929)	46
Special Design Problems in Vessels for High Pressures and Temperatures. By J. B. Crane.....(July 1929)	37
Standards of Steam Generation Move Up, The. By Carl Stripe.....(July 1929)	34
Steam Pressure Control for Stations Operating on a Two Pressure System. By James L. Kimball.....(Feb. 1930)	30
Steam Pressures for Industrial Plants Determined by Rational Factors. By W. A. Shoudy.....(Aug. 1929)	23

	PAGE
Stuff from which Engineering Progress is Made, The. By R. C. Denny.....(July 1929)	49
Submerged Combustion. By David Brownlie....(June 1930)	37
Sulphur in Flue Gases. By David Brownlie....(Oct. 1929)	43
Sulphur Fumes in Stack Gases. By David Brownlie. (March 1930)	41
Temperature Scales. By W. L. DeBaufre....(March 1930)	29
Test of Boiler No. 4, East River Station, The New York Edison Company. By W. H. Lawrence....(Nov. 1929)	25
Thermal Changes in Water and Steam. By W. L. DeBaufre. (June 1930)	31
Thermal Properties of Steam. By W. L. DeBaufre. (May 1930)	35
Trends in the Design of Coal Handling Systems. By H. S. Ford.....(May 1930)	19
Upper Drums of Large Modern Boilers Require Special Supports. By R. C. Denny.....(Aug. 1929)	27
Water Softening Practice in Great Britain. By David Brownlie.....(Jan. 1930)	39
Welded Boilers. By E. R. Fish.....(Dec. 1929)	35
World's Largest Gas Well Under Control, The..(May 1930)	47
World's Largest Steam Generating Unit in Operation, The. (Nov. 1929)	48
Writing of Technical Papers, The. By W. L. DeBaufre. (Sept. 1929)	29

Authors—

Ashley, George H. Case of Coal, The.....(June 1930)	24
Bailey, Alex D. Engineering Research.....(May 1930)	24
Barnard, W. N. Margins of Improvement in Station Heat-Rates.(June 1930)	21
Blais, Charles E. Greatly Improved Efficiency Follows Modernizing of Central Power Plant Serving Rhode Island State Institutions. (June 1930)	21
Bliss, Collins P. Standardization in Steam Plant Engineering. Feature Editorial.....(Dec. 1929)	21
Brooks, H. W. Some of the Industrial Uses to Which Powdered Coal is Being Applied.....(Oct. 1929)	46
Brownlie, David Combined Low Temperature Carbonization and Combustion for Power Stations.....(Dec. 1929)	43
Combined Total Gasification and Combustion of Coal (Nov. 1929)	35
Industrial Steam Generation Practice in Great Britain (July 1929)	40
Lessing Coal Cleaning Process, The.....(April 1930)	42
Lignite Power Stations in Germany.....(Sept. 1929)	25
New Developments in British Industrial Steam Station Practice.....(Feb. 1930)	39
Power Station Practice in Great Britain.....(Aug. 1929)	34
Recovering Unburnt Fuel from Ash Pit Refuse.(May 1930)	40
Submerged Combustion.....(June 1930)	37
Sulphur Fumes in Stack Gases.....(March 1930)	41
Sulphur in Flue Gases.....(Oct. 1929)	43
Water Softening Practice in Great Britain...(Jan. 1930)	39
Chapman, Merl J. Installing a Stoker Over the Week-End....(March 1930)	46
Clapp, Paul S. Public Utility Outlook for 1930, The. Feature Editorial. (Jan. 1930)	23
Crane, J. B. Progress in the Use of High Pressure Steam..(April 1930)	35
Special Design Problems in Vessels for High Pressures and Temperatures.....(July 1929)	37
Cross, B. J. Heat Balance Test as a Means of Obtaining Evaporative Efficiencies of Steam Generation Equipment, The. (July 1929)	43
How to Calculate the Air Required for Combustion and the Air Actually Supplied.....(Feb. 1930)	46
How to Calculate the Loss Due to Heat in Dry Flue Gas. (Aug. 1929)	46
How to Calculate the Losses Due to Hydrogen and to Moisture in Fuel.....(Sept. 1929)	52

GENERAL INDEX

(Continued from page 52)

	PAGE		PAGE
How to Calculate the Loss Due to Unburned Carbon. (Nov. 1929)	50	Klein, Julius Progress—1920 to 1930. Feature Editorial.. (April 1930)	19
How to Calculate the Loss Due to Water Vapor in Air Used for Combustion of Fuel..... (Oct. 1929)	52	Kimball, James L. Steam Pressure Control for Stations Operating on a Two Pressure System (Feb. 1930)	30
How to Compare the Relative Value of Different Fuels. (June 1930)	42	Kreisinger, Henry Processes of Combustion in a Furnace, The.. (Nov. 1929)	32
How to Determine the Conditions for the Most Economical Boiler Operation (March 1930)	44	Lawrence, W. H. Test of Boiler No. 4, East River Station, The New York Edison Company (Nov. 1929)	25
How to Determine the Moisture in Steam.... (April 1930)	48	Lundgren, Eric Bethlehem Steel Burns Blast Furnace Gas and Pulverized Fuel in an All Metal Furnace..... (Jan. 1930)	29
How to Determine the Suspended Solids in Flue Gases. (May 1930)	48	Mackenzie, J. W. Boiler Feed Water Regulation..... (Dec. 1929)	31
How to Estimate the Loss of Heat Due to Radiation from a Boiler Setting..... (Jan. 1930)	48	Markson, A. A. Development of a High Pressure System for Boiler Water Conditioning (April 1930)	27
Loss Due to the Presence of Carbon Monoxide in the Flue Gases, The. (Dec. 1929)	48	Marsh, T. A. Saving Midwestern Dollars by Matching Fuel Burning Equipment to Available Coal..... (July 1929)	50
Cruise, John Correct Method of Using the Oxygen Bomb Calorimeter for Determining the Heat Value of Solid Fuels. (Dec. 1929)	50	McQuade, J. D. Hayes Process Low Temperature Carbonization Plant at Moundsville, W. Va., The..... (Nov. 1929)	28
Darland, A. F. Airplane Carrier Lexington Helps Tacoma Meet Power Emergency (Feb. 1930)	44	Moberg, A. R. Is Soft Water the Criterion of Scale Prevention? (March 1930)	21
Davis, Harvey N. In 1930 Become an Engineer. Feature Editorial. (Feb. 1930)	23	Mumford, A. R. A Winter Morning Load Pick-Up..... (Jan. 1930)	47
DeBaufre, W. L. Atmospheric Air (Jan. 1930)	45	Feed Water Treatment of Special Importance at High Rates of Evaporation..... (Sept. 1929)	43
Engineering Units (Feb. 1930)	34	Myers, David Moffat Power and Heat Should be Coordinated. Feature Editorial. (Sept. 1929)	23
Heat and the First Law of Thermodynamics. (April 1930)	21	Partridge, E. M. Is Soft Water the Criterion of Scale Prevention? (March 1930)	21
Temperature Scales (March 1930)	29	Peebles, T. A. Principles of Automatic Control for Steam Boilers (Oct. 1929)	39
Thermal Changes in Water and Steam..... (June 1930)	31	Selection of Stoker Drives, The..... (Jan. 1930)	25
Thermal Properties of Steam, The..... (May 1930)	35	Pigott, R. J. S. Heat Absorbing Surfaces in Modern Boiler Furnaces. (July 1929)	29
Writing of Technical Papers, The..... (Sept. 1929)	29	Plapp, E. B. Natural Gas Burner Applications..... (March 1930)	24
deLorenzi, Otto Flexibility of Pulverized Fuel Installation of Advantage for Large Units..... (Aug. 1929)	43	Popkin, Martin E. Engineering. Feature Editorial..... (March 1930)	19
Denny, R. C. Stuff from which Engineering Progress is Made, The. (July 1929)	49	Engineer and His Place in our Industrial Society, The. (Oct. 1929)	25
Upper Drums of Large Modern Boilers Require Special Supports (Aug. 1929)	27	Price, Edward P. Phosphate Treatment of Boiler Water..... (Jan. 1930)	35
DeWolf, Roger D. Personnel—A Factor of Increasing Importance in the Modern Power Plant..... (Aug. 1929)	30	Reiter, Fred M. Combustion Characteristics of Gaseous Fuels. (June 1930)	28
Ebdon, H. G. Equipment of Highest Thermal Efficiency Not Always Justified for Industrial Steam Plants..... (Aug. 1929)	48	Renkin, W. O. Fuels and Furnaces in Heat Treatment of Steel. (March 1930)	38
Fergus, W. L. Influence of Modern Central Station Design Upon Indus- trial Power Plant Practice, The..... (Nov. 1929)	46	Savage, H. D. Recent Developments in Stoker Design..... (Nov. 1929)	40
Fish, E. R. Welded Boilers (Dec. 1929)	35	Sennhauser, Walter Practical Economies from Dry Quenching of Coke. (Sept. 1929)	47
Foltz, R. D. Refractory Furnace Developed for Modern Practice, The. (Aug. 1929)	39	Shoudy, W. A. Economies in the Generation and Distribution of Power. (May 1930)	30
Ford, H. S. Trends in the Design of Coal Handling Systems. (May 1930)	19	Steam Pressures for Industrial Plants Determined by Ra- tional Factors (Aug. 1929)	23
Gallalee, John M. New Industrial South, The..... (Oct. 1929)	29	Stripe, Carl Standards of Steam Generation Move Up, The. (July 1929)	34
Geiger, C. W. A 282 Mile Pipe Line for Natural Gas..... (Nov. 1929)	52	Struthers, William A. From Towering Firs to Kilowatts..... (Feb. 1930)	25
Grobli, W. A. Determination of the Dust Content of Gases. (April 1930)	31	Toensfeldt, Kurt Correct Boiler Design an Essential Factor in the Produc- tion of Dry Steam..... (Sept. 1929)	40
Hall, R. E. Discussion of paper "Development of a High Pressure System for Boiler Water Conditioning".... (May 1930)	45	Witherspoon, B. H. What Do I Wish? What Can I Do? Feature Editorial. (May 1930)	17
Humphries, W. Problems of the Small Plant..... (March 1930)	34	Wood, W. R. Mergers of Men and Equipment. Feature Editorial. (Nov. 1929)	23
Jardine, T. S. Problems of the Small Plant..... (March 1930)	34		
Jasper, T. McLean Building of Vessels for High Pressure and High Tem- perature Service..... (Dec. 1929)	23		
Johnston, William S. Placing a Steam Power Plant in Commission. (Sept. 1929)	35		
Junkersfeld, Col. Peter Technically Trained Leaders in Industry. Feature Edi- torial (Oct. 1929)	23
